DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-22 and 26-31, drawn to a system for coordinating synchronizer controllers, classified in class 713, subclass 400.
 - II. Claims 23-25, drawn to a computer system having an apparatus for coordinating synchronizer controllers, classified in class 713, subclass 401.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the different inventions Invention I uses a bus clock synchronizer controller for generating a set of inter-controller clock relationship control signals, wherein Invention II uses sync delay blocks and sync ratio sampler blocks for sampling the sync pulses..
3. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.
